Daniel J. Chandler, Managing Principal

As managing principal of OAC, Dan has nearly 30 years of experience in the northwest construction industry and is known for his integrity, leadership and team building skills. Dan has developed strong long-term relationships throughout the industry that add immeasurable value to each client and project. He applies a thorough, firm and fair approach - anticipating issues and achieving results. Dan's current services include project and program management, estimating, scheduling, value analysis, constructability review, and construction claims analysis and expert witness services.

Placing great significance on education and diverse experience, Dan is a licensed professional engineer, registered architect and has held management positions as both a subcontractor and general contractor on a wide variety of building projects. In addition, he has served as a construction laborer, superintendent, project manager, and owner's representative.
